## F FUTURE LOOPS

## Synthetik Series >> PHATTY SYNTH LOOPS

Future Loops presents "Phatty Synth Loops" a moogalicious collection of samples that capture the mighty of the Little Phatty!

Little Phatty is a monophonic analogue synthesizer with the classic Moog signature character and capable of producing amazing leads and bass sounds!

" **Phatty Synth Loops** " features over 600 Moog-drenched loops organized into 30 different sections. Each section has its own tone, melody and vibe.

You will be able to fully experience the wide array of powerful sounds the Little Phatty has to offer from bouncing leads to funky sequences , from resonating patterns to massive booming basses! All ready to be used in your productions 100% royalty-free!

Tempos range from 90 BPM to 125 BPM making " **Phatty Synth Loops** " perfect for many electronic styles and purposes: whether you're looking for a standout analog sound or a phat Moog lick " **Phatty Synth Loops** " is an inspiring gem!
