

Real Series >> Acoustic DNBass

Future Loops is proud to release **Acoustic DNBass**, a tight collection of Double Bass loops & one shots, specially forged for Drum N Bass productions!

The low-toned organic flow and cerebral tones in **Acoustic DNBass** will definitely lend a creative touch to drum and bass/jungle tracks! These Upright loops & one shots will fit like a glove in brainy/jazzy/intelligent DNB productions but will also easily adapt to other genres with some smart processing and tweaking.

Acoustic DNBass features a delicious assortment of deep bodied Double Bass loops, performed in multiple Keys, all at the DNB-friendly tempo of 170 BPM .

In addition, we have done all the hard editing work (so you don't have to) and pre-sliced the loops into hundreds of juicy One-Shots you can use to create new groove patterns from scratch ! Also worth mentioning is the fact that the loops come both in Acid Loops and REX formats.

Real Series >> Acoustic DNBass

Here's what you can find in **Acoustic DNBass**:

848 WAV Samples (162 MB before content duplication)

172 Loops
676 One Shots

172 REX Loops

If your DNB/Jungle tracks need a magic touch of jazz bass genius then you need **Acoustic DNBass** !
