

Future Loops presents **Dance Percussion 02** a collection of over **400 percussion Loops & One Shots** specially designed for Dance & Electronic producers .

Dance Percussion 02 is the second title of our dance-floor oriented Percussion collections and brings you rich live performances all impeccably recorded at the DJ-friendly tempo of 128 BPM.

Adding a taste of organic percussion patterns can propel the rhythm of an electronic production to a whole new level as the sultry , thumping drums lend depth and detail to the groove : from House, Tribal , Techno and Progressive to Electro , Breaks or Chill-Out .

The loops in **Dance Percussion 02** range from fast paced to tight & groovy , from relaxed to trance inducing, which means this collection will once again serve as a swing & groove booster or as an essential item to build complex percussive arrangements. Also ideal to engineer deep impact intros and/or breakdowns !

Inside **Dance Percussion 02** you will find 3 classic percussion instruments : Congas, Bongos and Djembe ! Each instrument offers you a unique tone so you have more possibilities to play with and mix in your tracks . Also included are 120+ One-Shots that will allow you to develop entirely new rhythmic patterns from scratch and come up with fully customized percussion grooves !

All loops in **Dance Percussion 02** were performed live by world-class percussionists :

353 Loops

114 Conga loops
126 Bongos loops
113 Djembe loops

129 One shots
